Secondary School Certificate — Marks: 87.40%

Jun. 2017 – Mar. 2018

Nagpur, Maharashtra

PERSONAL PROFILE

Developer skilled in React, Flutter, Firebase, Java, OOP, and databases. Combines technical expertise with teamwork, adaptability, and leadership to deliver efficient, real-world solutions.

INTERNSHIP

Persistent Systems Limited

Martian Summer Internship

June 2023 – Aug. 2023

Online

- Completed an intensive training program covering Java, DBMS, SQL, DSA, and Operating Systems, strengthening foundational knowledge for software development.
- Acquired practical understanding of core programming concepts and problem-solving techniques applicable to real-world projects.
- Received a certificate of completion recognizing technical proficiency and readiness to apply skills in personal and professional projects.

PROJECTS

Weather App | Flutter, Dart, REST API, Provider

June 2026

- Developed a Flutter Weather App with real-time weather and forecast data using a REST API.
- Implemented GPS-based current location detection using Geolocator and city-based weather search.
- Used Provider for state management to handle weather data, loading states, and API errors.
- Implemented screen navigation between the current-location weather screen and searched-city results.
- Structured the application into UI, Provider, Service, and Model layers for better maintainability.

AI-Powered Interview Assistant | React, Node.js, VS Code

September 2025

- Developed a full-stack web app to generate role-specific interview questions and conduct timed interview sessions.
- Implemented resume parsing and it automatically extract candidate details from files.
- Designed an interactive candidate management system for state handling and unique candidate tracking.
- Built a professional, responsive UI with features like file upload, live timers, and question flow control.

Smart Time Table Generator | Flutter, Dart, Firebase, Genetic Algorithm, Android Studio

January 2024

- Built an application using Flutter & Dart to automatically generate optimized timetables.
- Implemented a Genetic Algorithm to allocate subjects, teachers, and slots efficiently while reducing clashes.
- Integrated Firebase for authentication, real-time database storage, and seamless synchronization across devices.
- Designed an intuitive, user-friendly interface with dynamic form inputs and conflict-free schedule visualization.

TECHNICAL SKILLS

Languages: Java, JavaScript, Node.js, Python, HTML/CSS, SQL

Developer Tools: VS Code, Git, GitHub, Jupyter Notebook, Android Studio

Technologies/Frameworks: Linux, Pandas, NumPy, React, Flutter

LEADERSHIP / EXTRACURRICULAR

Class Representative

CR

2020 – 2022

SSGMCE, Shegaon

- Communicated decisions, changes, and updates from faculty back to the class.
- Gathered and consolidated feedback from the class on curriculum and learning experience.
- Coordinated events or initiatives for the class.

Position of Responsibility

- Management Head, E-CELL:** Led and organized events, coordinated teams, and guided members to promote entrepreneurship.
- Graphics Designer Head, CSESA:** Designed visuals and guided the team to ensure strong event branding.
